MCDONNELL DOUGLAS DC-10

The DC-10, scheduled for first flight in 1970, provides a new level of passenger comfort in its 20-foot-diameter cabin. It will fly up to 350 passengers at 600 mph over 200- to 3100-mile routes. The three fanjet engines, developing nearly 120,000 pounds of thrust, are cleaner, quieter, and more efficient than earlier jets.
